

# 108

Enric Batlle and Joan Roig, 2007

MODULAR SEAT SUITABLE FOR DIFFERENT USES AND LOCATIONS  
ADAPTING TO THE PARTICULARITIES OF THE SPACE WITHOUT TAKING OVER

- <sup>1</sup> | Versatile and modular
- <sup>2</sup> | Simple and discrete
- <sup>3</sup> | Complements the street lamp with the same name with which it shares its sober and robust appearance

Ocellets Park, **Barcelona (Spain)**

## Bench 108

Modular seat with rhomboid shapes with or without backrest, made from concrete and mass coloured. Urban bench arising from an angle, designed to shape limits, enclose land and form alignments. Its simplicity and

discretion make it fit into any urban space without taking over.

Due to its geometric characteristics, it only accepts curved alignments with large radii.

## Materials and finishes

Architectural concrete bench, with or without backrest, mass coloured in greyish tones, stripped aggregate finish, freestanding on the ground. It allows different finishes and colours, depending on the quantities to be supplied. It can be manufactured with recycled aggregates. The offer is completed with a piece of the same height and shape as the backrest, just to enclose land.

## Maintenance

Does not require maintenance.

## Installation

It is fastened with two bolts which are introduced into holes previously made in the paving and filled with epoxy resin, fast-drying cement or similar.

We recommend always leaving a space of 3 cm between the benches.

The bench is delivered packed.

Assembly instructions are enclosed with the bench.

## Weight

**Without backrest 48 cm:** 195 Kg.

**With backrest 48 cm:** 395 Kg.

**Without backrest 150 cm:** 625 Kg.

**With backrest 150 cm:** 1245 Kg.

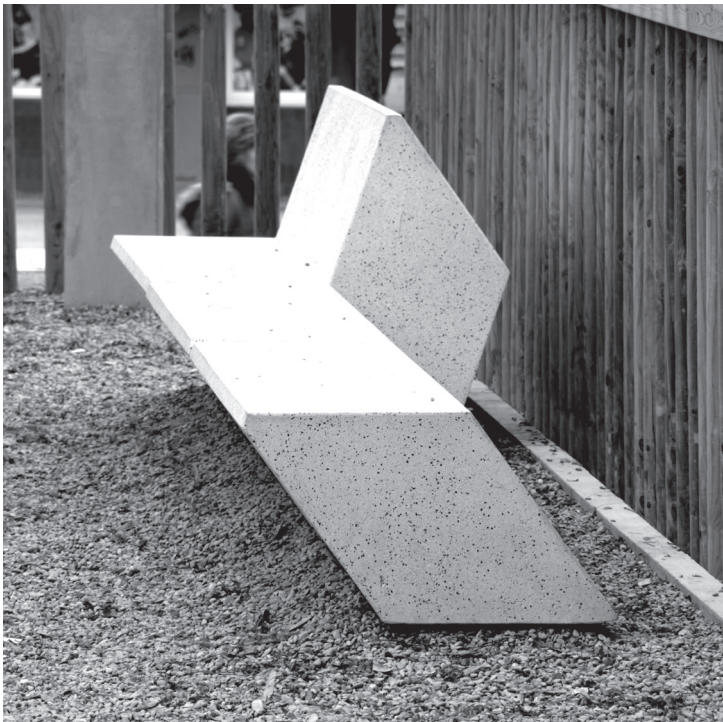

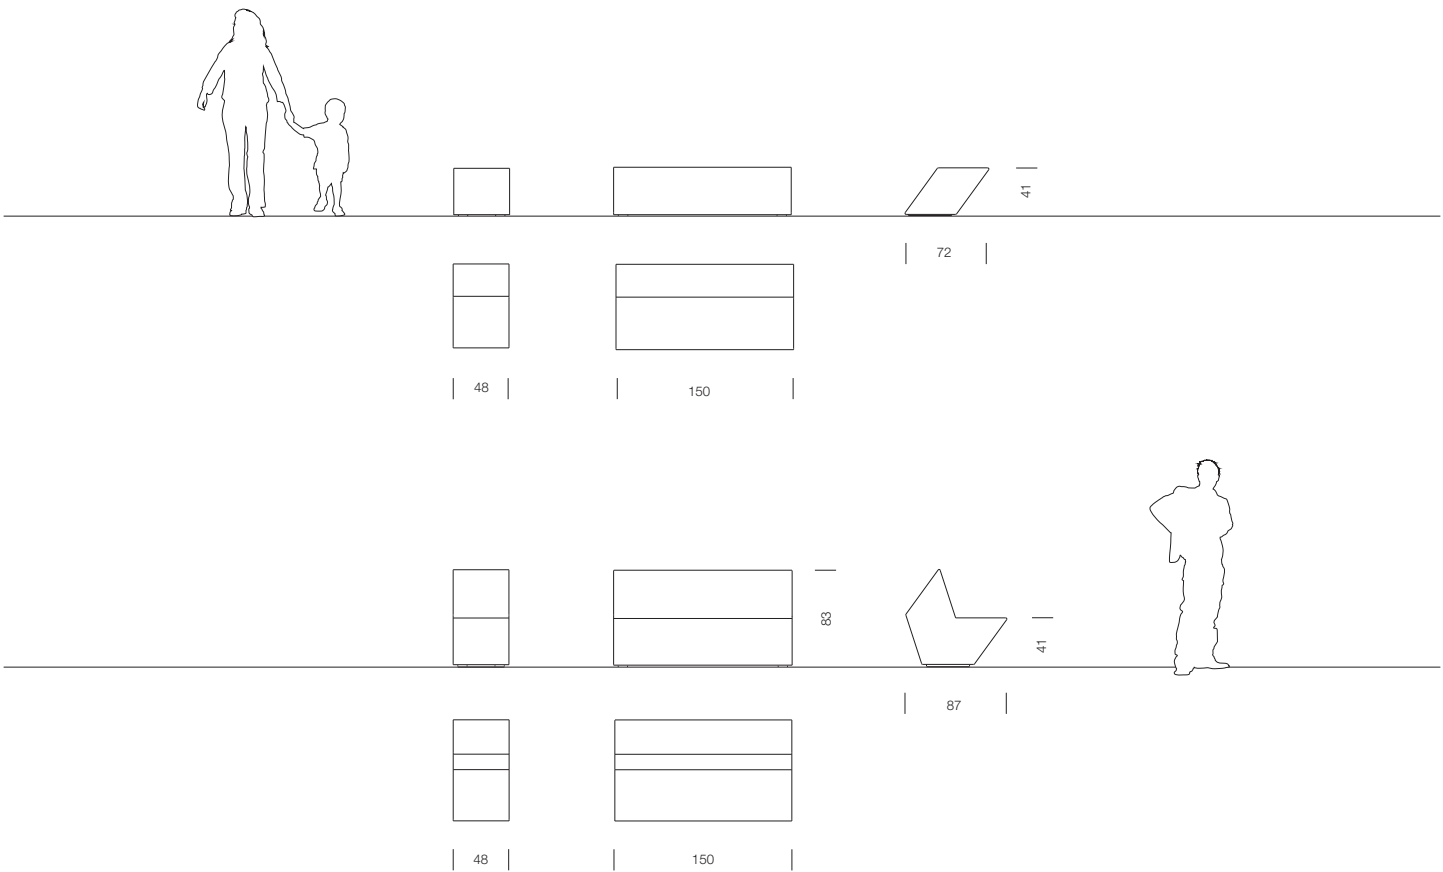

**Backrest 150 cm:** 915 Kg.
