VERY SOBER AND EASY TO HANDLE ELLIPTICAL LITTER BIN

- ¹ | Optimal for narrow pavements
- ² | Two models: standing and wall-mounted

Rambla Litter bin

Elliptical and robust litter bin made from galvanized steel and painted, easy to handle, suitable for narrow spaces. The Rambla urban litter bin, standing or wall-mounted, is a simple, economical and long-lasting product with a capacity of up to 42 l, despite how narrow it is.

Maintenance

Does not require maintenance.

Materials and finishes

AISI 304* stainless steel sheet bin, hot galvanized and painted cast black. Incorporates rings to help hold the bag. Structure consisting of two 40 x 40 mm L-shaped sections, welded to a stainless steel or hot galvanized steel circular plate.

* When AISI 316 stainless steel is required, please ask for prices and delivery dates.

Installation

The element is delivered assembled.
The litter bin is fixed to the paving with two blind steel bolts, welded to each plate and introduced into holes previously made and filled with epoxy resin, quick-drying cement or similar.
The assembly instructions are enclosed with the litter bin.

Weight / capacity

Wall-mounted litter bin: 9 kg. / 25 l.
Standing litter bin: 14 Kg. / 42 l.
